3.5 RM

VARIETY DESCRIPTION

AGRONOMIC FEATURES*

RELATIVE MATURITY	3.5	HILUM COLOR	IBL
STANDABILITY	8	SCN	R3, MR14
HEIGHT	MT	POD COLOR	TN
EMERGENCE	8	PUBESCENCE COLOR	GR
PLANT TYPE	М	FLOWER COLOR	Р
WHITE MOLD TOLERANCE	-	PROTEIN	-
PHYTOPHTHORA TOLERANCE	NG, 7.5	OIL	-
HIGH PH TOLERANCE	6		

Rating Scale: 9 = Excellent, 1 = Poor | Height: M = Medium, MT = Medium-Tall | Plant Type: M = Medium, MB = Medium-Bush, B = Bush Color: IBL = Imperfect Black, BL = Black, GR = Gray, BR = Brown, TN = Tan, TW = Tawny, LTW = Light Tawny, W = White, P = Purple

Verified Quality by THE NEBRASKA CROP IMPROVEMENT ASSOCIATION

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience. In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed. Always read and follow herbicide label directions prior to use: Enlist' products contain the Enlist trait that provides crop safety for use of labeled over-the-to-papilications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D' technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist' "crops are products that feature Colex-D technology are not authorized for use in conjunction with Enlist products. Enlist corn containing there to the containing the Enlist' and the Colex-D technology are not authorized for use in conjunction with Enlist products. Enlist corn contains genes that confer tolerance to 2,4-D and-fop herbicides. 2,4-D and-fop herbicides will damage or kill crops that are not tolerant to 2,4-D or-fops. Enlist E3* soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience lechnology. Use Agreement and Enlist's Soybean Product Use Guide. U.S. patents for

A CLOSER LOOK AT THE ENLIST® WEED CONTROL SYSTEM FOR SOYBEANS

2,4-D choline | Glyphosate | Glufosinate

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist E3® soybean crops.

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

- · Convenient proprietary blend of 2,4-D choline and glyphosate
- · The two sites of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Durango® DMA® herbicide, Liberty® herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm
